

TOPIC 9.A

Structure and Hygiene of the Excretory System

1. What is the function of excretion?
2. Briefly present the structure and function of the human excretory system.
3. What are the organic and inorganic components of urine?
4. Which blood component should not be present in the urine of a healthy person? What does it indicate if it is detectable?
5. The composition and quantity of urine vary even in a healthy person. What is the reason for and purpose of this variation?
6. Why and where can kidney stones form?

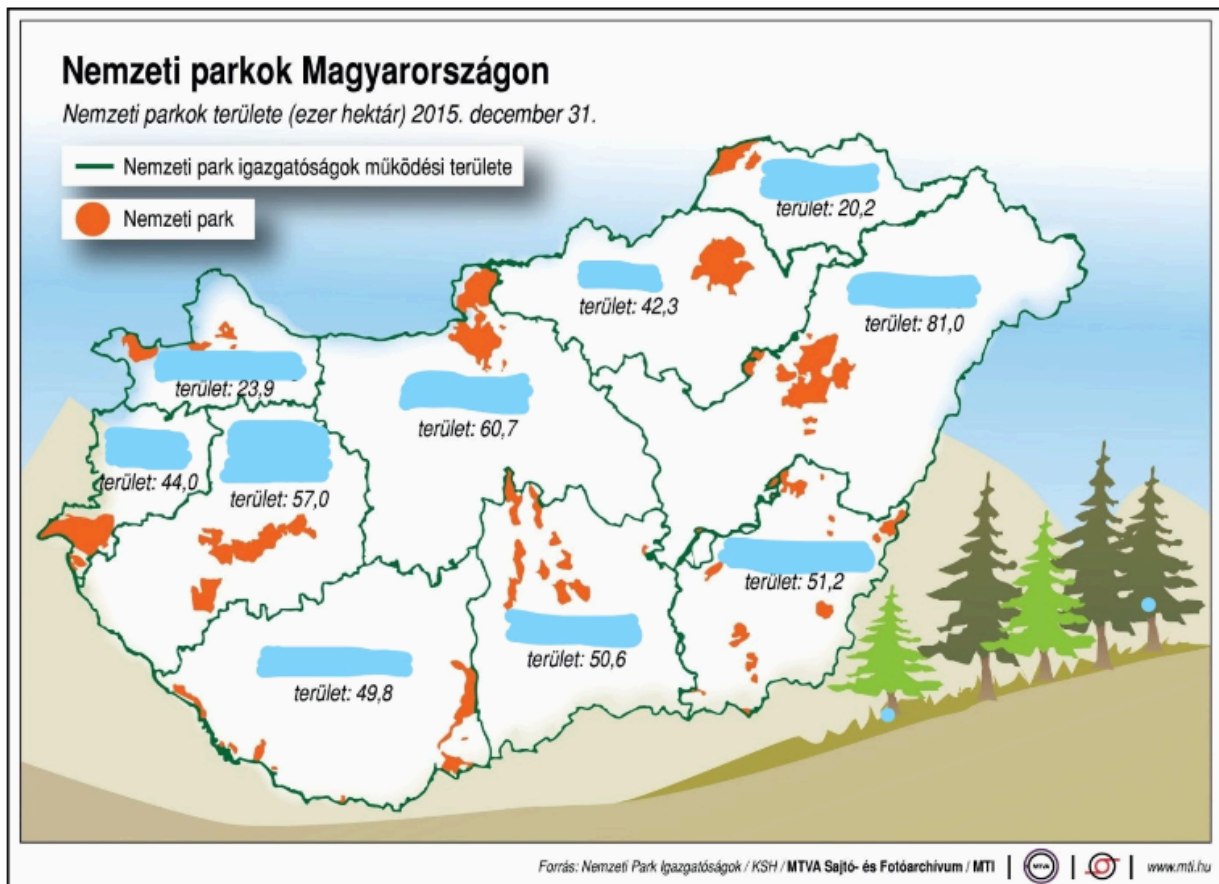

Expected Knowledge & Marking Scheme

No.	Expected Knowledge	Attainable points	Attained points
1.	Removal of excess water and harmful metabolic by-products.	2 pts	
2.	Kidney: renal cortex, renal medulla, renal pyramids, renal pelvis. The functional unit of the kidney is the nephron . In the kidney, urine is formed from the filtrate. Ureters: transport urine via peristaltic movement. Urinary bladder: a muscular, distensible organ that stores urine. Urethra: the channel through which urine leaves the body.	2+2+2+2+2 pts	
3.	Inorganic: mineral salts – chlorides, sulphates, carbonates. Organic: end products of protein and nucleic acid breakdown (urea, uric acid).	2+2 pts	
4.	Protein – indicates inflammation. Glucose – indicates diabetes.	4 pts	
5.	Maintenance of ion balance, fluid balance, and constant pH – homeostasis .	2 pts	
6.	Causes: Change in the pH of urine, precipitation of salts. Location: Can form in the kidney, ureter, or urinary bladder.	3 pts	
	Structure of the response, expressive skills	5 pts	
	Total	30 pts	

TOPIC 9.B

Characteristics of Biomes / Ecological Communities

1. Identify the national parks of Hungary on a map.
2. Describe the national park closest to your place of residence and its most important assets.

Expected Knowledge & Marking Scheme

No.	Expected Knowledge	Points
1.	Listing the national parks of Hungary.	10 pts
2.	Presentation of the Danube-Ipoly National Park (DINP): - Territory: Includes the Danube Bend, Visegrád Hills, Pilis Mountains, Börzsöny Mountains, Ipoly Valley, and Szentendre Island. - Founded: 1997. - Area: 403.14 <i>km²</i>. - Emblem animal: <i>Rosalia longicorn</i> (<i>Rosalia alpina</i>). - Highest point: Csóványos (Börzsöny). - Part closest to us: Strázsa Hill. - Special animal species: Eastern imperial eagle, Saker falcon, White-throated dipper, Brown trout, Fire salamander, <i>Gortyna borelii lunata</i> (endemic moth species), etc. - Special plant species: Pilis flax (<i>Linum dolomiticum</i>), Black pasqueflower, Siberian iris, Black hellebore, etc. - Built heritage: e.g., Visegrád Castle, Solomon's Tower, etc.	10 pts
